## Deliver collective outcomes: transcend humanitarian-development divides

### Individual Commitments

Commitment Description	Commitment Type	Core Responsibility	Commitment ID
ReBootKamp is using a revolutionary new pedagogy called 'bootcamp' training to rapidly improve the skills of refugees. It is the first to bring agile learning pedagogy (code bootcamps) to the Middle East but also the first to focus it squarely on refugees and those affected by conflict. Its technology offers a way out and helps solve one problem - a 10+ million job skills gap across the world, with another - forced migration.
