<td>Thailand pledges to continue to promote ratification of and accession to the Anti-Personnel Mine Ban Convention by States. It remains gravely concerned about the continued use of anti-personnel mines and strongly condemns any such use by any actor. It further pledges to uphold its commitment to meet the humanitarian goal of the Convention - a world free from the use and stockpiling of anti-personnel mines - and to put an end to the suffering caused by anti-personnel mines through their complete eradication.</td>

1. **Highlight the concrete actions taken between 1 January – 31 December 2017 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures.**

Thailand, a Party to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Antipersonnel Mines and on their Destruction, is one among the 82 mine affected states and has an original contaminated area of approximately 2,556 sq.km. under its jurisdiction. The Ministry of Defense has established Thailand Mine Action Center which works towards mine clearance. The current mine-cleared area is around 2,200 sq.km., leaving approximately 400 sq.km. to be cleared.

There remain challenges for mine clearance in terms of implementation, including complicated topography, climate conditions, over estimation of contaminated areas and the use of traditional mine clearance technologies and methods which are time and resource consuming.

Despite these challenges, Thailand is determined to eradicate all anti-personnel mines in the contaminated areas through various actions, among others, by shifting from traditional clearance methodology to modern ones, strengthening community engagement in affected areas, providing victims with necessary assistance and enhancing cooperation at both the national and international levels.

2. **A. How are you measuring progress toward achieving your commitments? Only the categories selected by the organisation will be seen below.**

- ☑ Through existing, internal systems or frameworks for monitoring, reporting and/or evaluation.

3. **A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.**

- ☑ Field conditions, including insecurity and access
- ☑ Human resources/capacity
- ☑ Information management/tools

4. **Highlight actions planned for 2018 to advance implementation of your commitments in order to achieve this transformation.**

- Shifting to more modern means to clear remaining anti-personnel mines in affected areas
- Strengthening community engagement in affected areas
- Providing victims with necessary assistance
- Enhancing cooperation at the national and international levels
Address the vulnerabilities of migrants and provide more regular and lawful opportunities for migration

1. Highlight the concrete actions taken between 1 January – 31 December 2017 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures.

Thailand’s 20-year National Strategy, in terms of security, aims to promote peace and security along the borders in an integrated and systematic manner, especially by developing effective immigration screening and monitoring systems, as well as surveys and demarcation processes.

The 12th National Economic and Social Development Plan (2017-2021) attaches great importance to improving access to and the delivery of healthcare services for foreign migrant workers and tourists. Moreover, it aims to enhance capacity building, knowledge sharing, exchange of best practices and strengthen cooperation to address international security threats, including illegal migration.

The Ministry of Justice has been appointed as a member of the Committee examining the obligation under the Protocol against the Smuggling of Migrants by Land, Sea and Air supplementing the Convention against Transnational Organized Crime. The Anti-Smuggling of Migrants (by Land, Sea and Air) Act is being drafted by the Committee with a view to enhancing the protection of migrants based on human rights, following recommendations by the Committee on the Elimination of Racial Discrimination (CERD) and the Universal Periodic Review (UPR).

Social Security Office (SSO) has improved its procedures concerning registration of foreign workers who have been permitted to work in Thailand. Currently workers from Lao PDR, Cambodia and Myanmar who are permitted to stay in Thailand temporarily are allowed to enroll in the Social Security Fund and the Workmen’s Compensation Fund which in turn would enable them to seek medical treatment free of charge at registered hospitals.

2. A. How are you measuring progress toward achieving your commitments? Only the categories selected by the organisation will be seen below.

- ☑ Through existing, internal systems or frameworks for monitoring, reporting and/or evaluation.
- ☑ By reporting to, or using reports prepared for, UN principal organs, UN governing boards, or other international bodies

3. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
4. Highlight actions planned for 2018 to advance implementation of your commitments in order to achieve this transformation.

Upcoming projects under the SSO Action Plan 2018 include, for example, promotion of better access to health services, health promotion and prevention of illnesses, dissemination of knowledge and information regarding social security schemes through various media outlets including social media as well as communication management. Since 2017, SSO has been continuously working with relevant agencies to establish one-stop service centers to facilitate the registration of workers from Lao PDR, Cambodia and Myanmar.

6. List any good practice or examples of innovation undertaken individually or in cooperation with others to advance this transformation.

Thailand's Social Security Office (SSO) has taken part in various committees involved with the management of foreign workers and continuously reports progress to the Ministry of Labour, with a view to implementing the commitments made in the ILO and other relevant Conventions to which Thailand is a party.

1. Highlight the concrete actions taken between 1 January – 31 December 2017 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures.

Thailand's Ministry of Social Development and Human Security, through the work of the Department of Women's Affairs and Family Development, is tasked with the promotion of gender equality and the empowerment of women and girls in all aspects of life. Women-related policies are guided mainly by the Women's Development Strategy under the National Economic and Social Development Plan as well as relevant international instruments such as the Convention on the Elimination of All Forms of Discrimination against Women, the Beijing Declaration and Platform for Action, and the 2030 Agenda for Sustainable Development.

The Thai Red Cross Society (TRCS) and the Ministry of Foreign Affairs jointly hold a biennial lecture series on international law on human rights and international humanitarian law. TRCS also disseminated IHL knowledge to more than 700 TRCS staff, volunteers, and officers from relevant organizations, many of whom were women working in disaster management field. During disasters or crises, TRCS deployed Rapid Assessment Teams to carry out Damage and Needs Assessments which always asked for specific needs of women and girls from community leaders and provided solutions as requested.

2. A. How are you measuring progress toward achieving your commitments? Only the categories selected by the organisation will be seen below.

☐ Through existing, internal systems or frameworks for monitoring, reporting and/or evaluation.

3. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☐ Multi-stakeholder coordination

6. List any good practice or examples of innovation undertaken individually or in cooperation with others to advance this transformation.

TRCS hosted an academic forum on children's rights for TRCS officers on 21 July 2017.

Thailand will identify disability focal point and/or establish technical help desks, in order to mainstream the issue of disability within humanitarian aid programmes and manage specific actions for people with disabilities.

**Operational**

**Leave No One Behind**

Thailand will make use of and support the development of improved and innovative methods of communication to ensure that persons with disabilities are reached during emergencies.

**Operational**

**Leave No One Behind**

Thailand will review current national relief services to ensure they are accessible to persons with disabilities.

**Operational**

**Leave No One Behind**

Thailand will routinely consult with persons with disabilities and their representative organisations during assessment and design of humanitarian programs.

**Operational**

**Leave No One Behind**

With respect to guidelines on persons with disabilities in the humanitarian action, Thailand will support the development and implementation of global guidelines on disability inclusion in humanitarian action and commit to provide technical expertise and participate in the Core Group working on the development of global guidelines on inclusion of persons with disabilities in humanitarian action.

**Policy**

**Leave No One Behind**

1. Highlight the concrete actions taken between 1 January – 31 December 2017 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures.

The Thai Red Cross Society (TRCS) carried out relief operations and cooperated with local authorities, Ministry of Social Development and Human Security as well as ICRC to provide primary healthcare, food and water for displaced persons in Rakhine State, Myanmar, and restored family links for displaced families. TRCS reviewed and adjusted relief services as necessary such as matching relief kit items to the vulnerable people's needs.

TRCS prepared minority groups for crisis. TRCS Community-based Disaster Risk Reduction Program took into account persons with disabilities by individually identifying them and assigning individual assistants during crisis. They participated in DRR training, drills and creation of community's action plan. Altogether 195 communities participated in the program in 2017. Having hosted first aid training for 83 migrant domestic workers in Thailand in 2016 under the Rights of Migrants in Action, TRCS joined the project advisory committee to evaluate the success of the project in 2017 and cooperated with IFRC to create training media in English and Burmese. The SPHERE Handbook was printed in Thai to be distributed to disaster-prone communities and the general public.

2. A. How are you measuring progress toward achieving your commitments? Only the categories selected by the organisation will be seen below.

☑ Through existing, internal systems or frameworks for monitoring, reporting and/or evaluation.

B. How are you assessing whether progress on your commitments is leading toward change in the direction of the transformation?

Thailand's key legal and policy instruments all require that vulnerable groups with special needs must first be provided assistance in times of disasters or emergencies. Community-based disaster risk management (CBDRM) is central to Thailand's disaster management strategy and members of these groups are encouraged to participate in disaster preparedness.

3. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Data and analysis
☑ Strengthening national/local systems
6. List any good practice or examples of innovation undertaken individually or in cooperation with others to advance this transformation.

Some of Thailand’s national-level group specific plans also contain aspects related to disaster management such as the National Child and Youth Development Plan. The Ministry of Interior, as the focal point for the implementation of the Sendai Framework, has been implementing various international standards including the Incheon Strategy.

</table>

1. Highlight the concrete actions taken between 1 January – 31 December 2017 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures.

**Strengthening national/local leadership and systems**

The Thai Red Cross Society (TRCS) maintains close cooperation with the Department of Disaster Prevention and Mitigation, Ministry of Interior, in the sharing of relevant information, resources, or building capacity and also incorporated guidelines from the Sendai Framework and the 2030 Agenda into the development of TRCS Action Plan for 2017-2021 for improved response to crisis and needs.

**Other-4A**

Thai Red Cross Society (TRCS) has incorporated climate change adaptation and considerations into DRR activities and ran a public disaster awareness programme through various channels (television, radio, World Disaster Reduction Day, etc.) at both national and local levels. On 1 October 2017, TRCS, the Department of Disaster Prevention and Mitigation, and other partners held an event called “ASEAN Day for Disaster Management and International Day for Disaster Risk Reduction 2017” in Bangkok under the theme “Applying King Bhumibol’s Sufficiency Economy Philosophy to Sustainable Disaster Risk Reduction.

**People-centered approaches (feedback mechanisms, community engagement, etc)**

TRCS and the Ministry of Social Development and Human Security planned to sign a Memorandum of Understanding to carry out the project “Senior Complex Bang Lamung 1”, aimed at providing healthcare and rehabilitation for senior citizens and elderly bed-ridden patients as well as housing for other senior citizens. TRCS are also planning to organize training courses to volunteers and caregivers of the elderly.

1. Highlight the concrete actions taken between 1 January – 31 December 2017 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures.

The Department of Disaster Prevention and Mitigation is Thailand's focal point for disaster management and has co-chaired the ASEAN Committee on Disaster Management Working Group on Prevention and Mitigation (ACDM). The Working Group meeting is conducted under the ASEAN Agreement on Disaster Management and Emergency Response (AADMER) Work Programme. There are 6 priority projects as follows: (1) ASEAN Safe School Initiative (ASSI), which aims at strengthening the implementation and promotion of a comprehensive approach in school safety programmes in ASEAN; (2) Building Disaster and Climate Resilient Cities in ASEAN, to ensure resilience of cities and urban centers to disasters and climate risks; (3) Strengthening Institutional and Policy Framework on Disaster Risk Reduction and Climate Change Adaptation Integration, which aims to strengthen institutional and policy frameworks on Disaster Risk Reduction (DRR) and Climate Change Adaptation (CCA) integration in the region; (4) Strengthening community resilience through Peer to Peer Learning (P2P Project); (5) ASEAN Disaster Risk Financing and Insurance, which recognizes the need to incorporate disaster risk management into economic development agenda to ensure social and economic resilience; (6) ASEAN Science-based Disaster Management Platform; and (7) ASEAN Day for Disaster Management, to raise awareness on disaster management in the ASEAN region.
