</table>
Germany will use early warning system and peace and conflict analysis approach to identify needs in countries of large forced displacement and take rapid action to contribute preventing situations from becoming protracted.

In preparation for the international conference [i.e. World Prevention Forum], Germany aims at convening a regional forum on conflict prevention to identify and advance elements of successful conflict prevention, which include the participation of the private sector and civil society.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany supports the Secretary-General in strengthening conflict prevention at the UN, including as member of the UN Security Council, the Peacebuilding Commission and Groups of Friends (e.g. on Sustaining Peace). Germany supports the reform efforts to focus on prevention.

Through its long-standing partnership with the OECD, World Bank and the UN, Germany contributes to major debates around more effective approaches in fragile and conflict-affected contexts. As DAC International Network on Conflict and Fragility (INCAF) Co-Chair, Germany supports increased dialogue among donors, fragile states, multilateral institutions and civil society with a view to sharing good practices and lessons learnt on conflict prevention. Germany supported relevant research and studies and hosted discussions with the UN, World Bank and others on implementing the key findings of the UN-WB Pathways for Peace report and the Syria Analytical Roadmap. Germany actively contributed to fora such as the World Bank Fragility Forum.

The German Government uses several early warning tools, in particular a tool measuring the escalation potential in partner countries of development cooperation (ESKA) and a mass data tool (PreView) for crises worldwide. Processes have been designed for the systematic use of conflict analyses and strategic foresight to inform strategy/planning processes regarding early action/crisis prevention, but also stabilization and humanitarian assistance. Inter-ministerial meetings of heads of early warning divisions and high-level meetings of political directors have been established. Germany continued to support the EU Early Warning System: The EUEWEA forum has taken place twice (Berlin, Brussels). Germany supported the UN and the World Bank to improve analysis and early warning capacities for each institution and jointly.

Germany continues to contribute to improving early warning and early action capacities of the African Peace and Security Architecture, African Union and ECOWAS.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit

- New Way of Working
- The Peace Promise

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
☑ Buy-in
☑ Data and analysis
☑ Field conditions, including insecurity and access

B. How are these challenges impacting achievement of this transformation?

Conflict prevention demands a paradigm shift of policy-makers and institutions. It is necessary to adapt structures and instruments, dedicate resources and adapt how/when to look at crisis. Moving collectively from early warning to early action is particularly challenging, as is to maintain political focus transitioning from peacekeeping to peacebuilding.

3. What steps or actions are needed to make collective progress to achieve this transformation?

A leading role by multilateral organisations, well-equipped analysis and constant exchange about early warning tools and methodologies can provide a basis for better collective achievements. The 2019 High-Level Political Forum on Sustainable Development (HLPF) should be used to demonstrate strategic political leadership for advancing implementation of Sustainable Development Goal 16 “Peace, Justice and Strong Institutions”. Cooperation should be strengthened among the different stakeholders to broaden the buy-in for peacebuilding.
## Individual Commitments

<table>
<thead>
<tr>
<th>Commitment</th>
<th>Commitment Type</th>
<th>Core Responsibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>Germany commits to further support the complementary use of available national instruments within Germany’s approach to fragile contexts coordinated through the Steering Group of the International Dialogue on Peacebuilding and Statebuilding.</td>
<td>Operational</td>
<td>Political Leadership to Prevent and End Conflicts</td>
</tr>
<tr>
<td>Approximately 40% of German development cooperation funds (country programmable aid) are currently spent in fragile states; Germany endeavors to further strengthen its engagement in fragile contexts in its effort to sustainably reduce root causes of conflicts and humanitarian needs. Germany is committed to implement all its development cooperation measures in a conflict-sensitive manner using the peace and conflict assessment methodology.</td>
<td>Financial</td>
<td>Political Leadership to Prevent and End Conflicts Invest in Humanity</td>
</tr>
<tr>
<td>As a signatory member of the New Deal for Engagement in Fragile States, Germany is committed to the New Deal principles which include the use of fragility assessments and joint risk analysis amongst donor and partner countries for joint planning purposes, wherever possible. Germany has supported the piloting of a joint risk assessment exercise in Somalia.</td>
<td>Policy</td>
<td>Political Leadership to Prevent and End Conflicts</td>
</tr>
<tr>
<td>Germany commits a yearly development assistance budget of approximately EUR 1.3 billion for measures directly and indirectly targeted at peacebuilding, conflict prevention and conflict in fragile partner countries by addressing structural root causes of conflict and fragility. A new strategic orientation on conflict prevention and management will provide the conceptual basis and strategic direction for the engagement of the German development cooperation. This includes strengthening the participation of women and youth in peacebuilding.</td>
<td>Financial</td>
<td>Political Leadership to Prevent and End Conflicts Invest in Humanity</td>

</tbody>
</table>

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

The German government has shown continued leadership in crisis prevention, conflict resolution, peacebuilding and humanitarian assistance on a bilateral and multilateral level. Germany started the process of inter-ministerial strategies on Security Sector Reform (SSR), Rule of Law and Transitional Justice. Germany strengthened its project support and policy development in peace mediation and peacebuilding, e.g., by enhancing relevant structures within the German Federal Foreign Office and thereby bringing in additional expertise, refining and adapting concepts and policies, and through training. In 2018, Germany actively supported international and regional fora for crisis prevention and stabilization, like the Lake Chad Conference in Berlin and the Lake Chad Governors Forum in the region.

Germany continues to implement its guidelines on “Preventing Crises, Resolving Conflicts, Building Peace” and gives priority to crisis prevention and addressing structural causes of conflict. More than 66 per cent of Germany’s partner countries are fragile. The Federal Ministry for Economic Cooperation and Development (BMZ) is investing over EUR 2 billion per year to prevent crises, resolve conflicts and build peace. Staff secondments to fragile contexts are supported by preparatory trainings on conflict sensitivity/prevention. Inter-ministerial training formats have been strengthened to foster a whole-of-government approach and coherence across the Humanitarian-Development-Peace Nexus.

As co-chair of the Organisation for Economic Co-operation and Development International Network on Conflict and Fragility (OECD-INCAF), Germany actively supported the drafting of the OECD’s Development Assistance Committee (DAC) Recommendation on the Humanitarian-Development-Peace Nexus. Germany engages continuously with fragile states (g7+) through the International Dialogue on Peacebuilding and Statebuilding (IDPS) and supports g7+ countries to engage in relevant international policy debates. In addition, Germany provides funds to the United Nations Development Programme SDG Implementation Facility for Fragile and Conflict Settings to provide support in g7+ countries.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit

☑ Grand Bargain
☑ New Way of Working
☑ The Peace Promise

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
☑ Adherence to standards and/or humanitarian principles
☑ Field conditions, including insecurity and access
☑ Joined-up humanitarian-development analysis, planning, funding and/or response

B. How are these challenges impacting achievement of this transformation?

Local security constraints, unforeseen crises and/or massive forced displacement impede progress on implementation. The New Deal on Engagement in Fragile States is a trilateral initiative with commitments that require extensive institutional change and political will. Nexus implementation requires understanding of the need for a principled approach to humanitarian assistance.

3. What steps or actions are needed to make collective progress to achieve this transformation?

International crises, conflicts as well as post-conflict environments need quick and decisive actions from the international community plus prudent and coordinated approaches. A focus on the prevention of crises is key.
Develop solutions with and for people

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

After adopting its second National Action Plan (NAP) in 2017, Germany continued to implement its five priorities, (1) systematically integrating a gender perspective into the prevention of conflicts, crises and violence; (2) expanding participation and strengthening the leadership role of women in all phases and at all levels of conflict prevention and resolution, stabilization, peacebuilding and reconstruction, as well as post-conflict rehabilitation and peacebuilding; (3) analyzing and taking into account the concerns and interests of women and girls in development, peace, security policy and humanitarian measures; (4) improving protection from sexual and gender-based violence at the national and international level, and working against the impunity of perpetrators; and (5) strengthening the Women, Peace and Security agenda and promoting it at the national, regional and international level. In 2018, Germany, together with Spain and Namibia, chaired the Women, Peace and Security (WPS) Focal Points Network, and held high-ranking meetings of the global network in Berlin and New York. Germany partnered with Namibia in the G7 WPS initiative to enhance NAP development and implementation in the Southern African Development Community region. Through the Informal Task Force on WPS, Germany contributed to the development of the European Union’s new Strategic Approach on WPS; it continued to be a major financial and political supporter of the African Women Leaders’ Network (AWLN), and joined the newly founded Group of Friends of the AWLN. Germany continued close cooperation with civil society through project funding, two consultation meetings, and two subject-related exchanges. Germany continued its development cooperation with UN Women with the project “Sustainable Livelihood Activities for Women and Reduction of SGBV among Displaced Populations and Host Communities in South Sudan, Mali”.

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

- Data and analysis
- Field conditions, including insecurity and access
- Gender and/or vulnerable group inclusion

B. How are these challenges impacting achievement of this transformation?

Lack of gender disaggregated data of vulnerable groups and persons in vulnerable situations can be a difficulty in measuring impact. In conflict-affected areas, working with traumatized target groups requires the adaptation of measures according to their needs. This is also true for the staff working under these challenging conditions.

3. What steps or actions are needed to make collective progress to achieve this transformation?
We need to keep operationalizing the fundamental principle to “Leave no one behind” in our humanitarian assistance as well as in all our programs in our partner countries and adapt our indicators accordingly. Different and specific needs of everyone affected by disasters, conflicts and displacement need to be equally considered; the human rights principles of non-discrimination and participation must be guaranteed. Germany promotes multi-sectoral and multi-stakeholder initiatives in order to achieve gender equality in societies.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany has, for a long time, been an important donor and vocal proponent of the protection of civilians. That is reflected by its support for mine action. In 2018, Germany has continued to implement its strategy on humanitarian mine action and provided a significant amount of funding. In 2018, Germany funded over 31 mine action projects with a total budget of more than EUR 36 million.

Germany follows a holistic approach that encompasses all pillars of mine action, from risk education for internally displaced persons and returnees when hostilities cease, clearance of landmines, IEDs and explosive remnants of war to victim assistance, and physical rehabilitation.

Another focus of Germany’s funding for mine action is the development of strong, efficient and effective local capacities. To this end, Germany supports the United Nations Mine Action Service (UNMAS), the United Nations Development Programme (UNDP) and the Geneva International Centre for Humanitarian Demining (GICHD). Mine action projects have been funded, in accordance with the strategy, in ten priority countries but also in acute humanitarian crises. Multi-year funding is provided whenever possible to increase the efficiency of Germany’s mine action funding and to give partners a certain funding security. Germany promotes the universalization of the Ottawa and Oslo Conventions by funding the International Campaign to ban Landmines and Cluster Munition Coalition.

Furthermore, the ICRC, which has a special mandate for the protection of civilians, is among the three main partner organizations of German humanitarian assistance and was supported with nearly 150 million EUR in 2018. Germany continued to support the ICRC’s efforts to engage in dialogue with and operate in areas controlled by non-state armed groups.

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Buy-in
☑ Field conditions, including insecurity and access
☑ Funding amounts
B. How are these challenges impacting achievement of this transformation?

Like in 2017, lack of buy-in from local authorities leads to donor fatigue as little progress is made. Safe access for mine action operators is a major challenge in some of the most heavily impacted regions. All affected countries need to implement the land-release approach for mine action.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Non-state armed groups need to adhere to International Humanitarian Law and stop the production and widespread use of victim-activated improvised explosives. Local mine action authorities need to fully implement the land-release approach to ensure efficient use of funding.

</tbody>
</table>

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany has continued to uphold the humanitarian principles of humanity, impartiality, neutrality and independence in its humanitarian assistance and has continued to advocate respect for these principles by other actors. In the nexus debate, Germany promotes an approach that is based on the respective mandates of the different actors. Throughout 2018, Germany increased its efforts to strengthen the capacities of humanitarian negotiators in order to ensure humanitarian access and started to fund the Geneva-based Centre of Competence on Humanitarian Negotiation (CCHN). CCHN offers humanitarian negotiators training opportunities as well as the opportunity to confidentially exchange across agencies in a “community of practice” and further develop their expertise. Moreover, Germany started to develop a concept for a two-year initiative on safeguarding humanitarian space, to be implemented during Germany’s membership in the UN Security Council (2019-2020). The initiative will address, inter alia, the protection of humanitarian and medical personnel, humanitarian access and respect for International Humanitarian Law (IHL) and humanitarian principles. This includes a joint German-French initiative on strengthening respect for IHL and humanitarian principles to take place during the subsequent UN Security Council presidencies of France and Germany in 2019.

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
Adherence to standards and/or humanitarian principles
Field conditions, including insecurity and access
IHL and IHRL compliance and accountability

B. How are these challenges impacting achievement of this transformation?

Adherence to the central pillars of the humanitarian space – International Humanitarian Law and the humanitarian principles – is eroding due to increasing disregard for and violations of the existing normative framework and thus negatively impacting access to and protection of humanitarian and medical missions.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Actions need to be dedicated to protecting and reinforcing the central pillars of the humanitarian space. Germany is not striving for the creation of new norms, but for the implementation and communication of existing standards and concrete opportunities for improvement. Accordingly, Germany’s two-year initiative on safeguarding humanitarian space, to be implemented during the time of Germany’s membership in the UN Security Council (2019-2020) aims to address and further the respect for IHL and humanitarian principles.

Commit to speak out and systematically condemn serious violations of international humanitarian law and serious violations and abuses of international human rights law and to take concrete steps to ensure accountability of perpetrators when these acts amount to crimes under international law.  

Uphold the Norms that Safeguard Humanity

Implement a coordinated global approach to prevent and respond to gender-based violence in crisis contexts, including through the Call to Action on Protection from Gender-based Violence in Emergencies.  

Uphold the Norms that Safeguard Humanity

Fully comply with humanitarian policies, frameworks and legally binding documents related to gender equality, women's empowerment, and women's rights.  

Uphold the Norms that Safeguard Humanity Leave No One Behind

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

IHL and IHRL compliance and accountability

Regarding promoting compliance with international humanitarian law (IHL) and promoting criminal justice systems, Germany remained a staunch supporter of the fight against impunity and especially the efforts of the International Criminal Court to hold perpetrators of genocide, war crimes and crimes against humanity accountable. Advocacy for the 'Code of Conduct regarding Security Council action against genocide, crimes against humanity or war crimes' continued to be part of Germany's efforts to promote accountability to the most serious crimes known to humanity. Germany continued participating in consultations organized by the International Committee of the Red Cross (ICRC) and Switzerland on strengthening compliance with IHL. Where German courts have jurisdiction, Germany commits to take specific measures to bring to account actors who impede humanitarian access to civilians.

In the field of German development cooperation, the Special Initiative on Forced Displacement supports the Genocide Commission in Iraq through Germany's Civil Peace Service. The project focuses on violence against Yazidi and other women and supports the documentation of cases of sexual and gender-based violence (SGBV). Witnesses and other survivors receive psychosocial support.

In Cambodia, Germany supports the project 'Women and Transitional Justice in Cambodia' via the Civil Peace Service and promotes access to justice for female survivors and victims of gender-based violence under the Khmer Rouge.

Gender-based violence prevention and response

Germany supports human rights projects, including projects focused on prevention of harmful practices, such as child, early and forced marriage and female genital mutilation. In 2018, Germany supported a project 'Protecting girls from the harm of child marriages in Zambia', with the aim of raising awareness among parents and communities about the harm of such practices as well as to inform girls about their rights. As part of German development cooperation in 2018, 140 service providers and around 3,000 community leaders in South Sudan received training on the prevention of and response to gender-based violence (GBV). In Kenya, a campaign to 'End Early Marriages' was conducted. German development cooperation is also implementing various projects on preventing Female Genital Mutilation (FGM) and other harmful traditional practices among others in Burkina Faso and Guinea.

Germany supported ICRC's Special Appeal 'Strengthening the Response to Sexual Violence'. In 2018, Germany provided funding for five projects with mental health and psychosocial support activities in Iraq, targeting specifically vulnerable women, girls and victims of gender-based violence. Germany also supported a project promoting cooperation between governmental, non-governmental and private sector actors in Southern Africa to prevent violence against women and girls.

Protection against sexual exploitation and abuse (PSEA)

Together with other donors, Germany committed itself to a wide range of measures to tackle sexual exploitation and abuse in humanitarian assistance and development cooperation at the Safeguarding Summit in London in October 2018. To institutionalise safeguarding and facilitate implementation, Germany coordinates with other donors through a technical working and a OECD-DAC group on sexual exploitation and abuse. Regarding humanitarian assistance, Germany has adjusted its funding requirements to reflect PSEA and supports its NGO partners in the implementation of the Inter-Agency Standing Committee (IASC) Minimum Operating Standards on PSEA. This includes funding for training on PSEA-related issues.

Other

In order to improve partnerships and create new ways to raise awareness of trafficking in persons, Germany supported two leadership and innovation labs on the hidden presence of trafficking in women and children, which were organised in the framework of a cooperation between the Thomson Reuters Foundation and GIZ.
2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Data and analysis
☑ Field conditions, including insecurity and access
☑ Gender and/or vulnerable group inclusion

B. How are these challenges impacting achievement of this transformation?

Regarding sexual and gender-based violence, many cases are not reported and data availability is limited, also due to the sensitivity of the issue. This creates challenges when designing evidence-based programmes and projects. Regarding PSEA, significant strengthening of national/local systems is needed to create victim-centered organisational structures.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Germany joined the UN Security Council as a non-permanent member in January 2019 and will use this membership to promote progress for the Women, Peace, Security agenda in the coming two years. The implementation of UN Security Council Resolution 1325 is one of the priorities of the German membership. It is important to keep the momentum for PSEA through regular coordination until effective safeguarding is established in the sector.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany aims at tackling the threat small arms and light weapons (SALW) as well as landmines pose. In 2018, Germany continued to promote the use of “country coalition concepts” and the new format of “military-to-military dialogues”, which were introduced during its presidency of the Convention on Cluster Munitions (CCM) in 2017. Germany funded mine action programs in 13 different States, contributing more than EUR 36 million to clearing mines and explosive remnants of war (ERWs), to advocate for mine action, to build capacity and to prevent through education. With its partners, Germany initiated a roadmap process for comprehensive SALW control in the Western Balkans and supports the African Union’s Silencing the Guns initiative, as well SALW control in Latin America and the Caribbean (contributing globally more EUR 15 million per year). The emphasis on regional approaches tackling illicit trafficking and misuse of SALW contributes to the UN Secretary-General’s ‘Disarmament that Saves Lives’ initiatives, as do the efforts to reduce illicit ammunition flow. Germany was re-elected chair of the Arms Trade Treaty Voluntary Trust Fund Selection Committee and contributed USD 600,000 to the fund in 2018 and helped initiate 11 projects aimed at Arms Trade Treaty implementation.

Germany engaged in the intergovernmental process as set out in Resolution 2 of the 32nd International Conference of the Red Cross and Red Crescent in 2015 to find agreement on features and functions of a potential forum of States and ways to enhance the implementation of IHL using the potential of the RC/RC Movement, its International Conference and IHL regional forums.

The topic of improving the effectiveness of mechanisms of compliance with IHL has been addressed in many bilateral and multilateral meetings to prepare for the consultations in Geneva and to develop common positions with like-minded states. Germany regrets that no consensus was found during the fifth formal meeting in December 2018.

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this
transformation. Only the categories selected by the organisation will be seen below.

- Data and analysis
- IHL and IHRL compliance and accountability
- Multi-stakeholder coordination

B. How are these challenges impacting achievement of this transformation?

Main challenges resulted from the complexity of the topic discussed and finding consensus between participating States.

3. What steps or actions are needed to make collective progress to achieve this transformation?

All States participating in the intergovernmental process would have to find consensus on ways to enhance the implementation of international humanitarian law using the potential of the International Conference of the Red Cross and Red Crescent Movement and International Humanitarian Law regional forums.

<td>Operational</td>
<td>Leave No One Behind</td>
</tr>
</tbody>
</table>
Germany, in implementing the new Strategy of the Federal Foreign Office on Humanitarian Assistance to refugees and displaced persons, will further strengthen contributions to Humanitarian Appeals of the UN as well as the Red Cross Red Crescent Movement covering needs in countries of origin, host countries and transit countries.

In order to enhance protection in situations of displacement, Germany commits to strengthen its internal capacities as well as that of its partners.

In order to increase efficiency of humanitarian assistance in situations of displacement, Germany will increase and promote multi-year humanitarian financing, livelihood interventions as well as cash-based assistance.

In supporting the new Platform on Disaster Displacement, Germany commits to help developing practices to prevent and address disaster displacement, working across the sectors of humanitarian action, human rights protection, migration management, refugee protection, disaster risk reduction, climate change adaptation and development.

Recognising the importance of financing long-term refugee (and IDP) caseloads in protracted crises and of countries hosting these caseloads as a global public good, Germany commits to advocating/using its position on the Boards of the International Financial Institutions, and particularly the World Bank, to ensure that the forthcoming Multilateral Development Bank replenishments deliver a relevant, coherent and cost effective set of instruments to respond to the challenge of fragility, disasters, and crises.

### Core Commitments

<table>
<thead>
<tr>
<th>Commitment</th>
<th>Core Responsibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commit to a new approach to addressing forced displacement that not only meets immediate humanitarian needs but reduces vulnerability and improves the resilience, self-reliance and protection of refugees and IDPs. Commit to implementing this new approach through coherent international, regional and national efforts that recognize both the humanitarian and development challenges of displacement. Commit to take the necessary political, policy, legal and financial steps required to address these challenges for the specific context.</td>
<td>Leave No One Behind</td>
</tr>
<tr>
<td>Commit to promote and support safe, dignified and durable solutions for internally displaced persons and refugees. Commit to do so in a coherent and measurable manner through international, regional and national programs and by taking the necessary policy, legal and financial steps required for the specific contexts and in order to work towards a target of 50 percent reduction in internal displacement by 2030.</td>
<td>Leave No One Behind</td>
</tr>
</tbody>
</table>
Acknowledge the global public good provided by countries and communities which are hosting large numbers of refugees. Commit to providing communities with large numbers of displaced population or receiving large numbers of returnees with the necessary political, policy and financial, support to address the humanitarian and socio-economic impact. To this end, commit to strengthen multilateral financing instruments. Commit to foster host communities’ self-reliance and resilience, as part of the comprehensive and integrated approach outlined in core commitment 1.

Commit to collectively work towards a Global Compact on responsibility-sharing for refugees to safeguard the rights of refugees, while also effectively and predictably supporting States affected by such movements.

Commit to actively work to uphold the institution of asylum and the principle of non-refoulement. Commit to support further accession to and strengthened implementation of national, regional and international laws and policy frameworks that ensure and improve the protection of refugees and IDPs, such as the 1951 Convention relating to the Status of Refugees and the 1967 Protocol or the AU Convention for the Protection and Assistance of Internally Displaced Persons in Africa (Kampala convention) or the Guiding Principles on internal displacement.

Leave No One Behind

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Refugees

Germany contributed substantively to the development of the Global Compact on Refugees (GCR) and strongly supported its endorsement in the UN General Assembly in December 2018. Germany supported the implementation of the Comprehensive Refugee Response Framework (CRRF) through support to UNHCR’s CRRF Task Team and outreach activities as well as through targeted humanitarian assistance and development-focused programmes in pilot countries. Furthermore, Germany, being in 2018 the sixth-largest refugee-hosting country worldwide, played an active role in the group of the biggest host countries (“300k”) in Geneva.

Germany comprehensively provides protection and assistance to refugees according to need in host countries and transit countries as well as for returnees in countries of origin. To this effect, Germany continued to prioritize displacement-related situations in its humanitarian engagement. Germany remained UNHCR’s second largest bilateral donor in 2018 (EUR 333 million). Germany also strengthened its development-oriented approaches towards forced displacement, in particular through new commitments of more than EUR 512 million through its special initiative ‘Tackling the root causes of forced displacement – reintegrating refugees’.

IDPs (due to conflict, violence, and disaster)

Most of Germany’s EUR 1.54 billion humanitarian funding was allocated to displacement-related situations, making it the second largest donor in the Syria context. Also, Germany funded a project of the Internal Displacement Monitoring Centre to improve data and analysis for more informed and targeted humanitarian programming and policy-making, leading to better preparedness and response to internal displacement crises. Germany supports the implementation of the Guiding Principles of Internal Displacement through programmes for internally displaced persons (IDPs) and returnees in countries as diverse as Afghanistan, Iraq, Nigeria, Ukraine and the Philippines. On the 20th anniversary of the Guiding Principles, Germany welcomed the Special Rapporteur on the Human Rights of IDPs for an exchange on strengthening the rights and participation of IDPs. Germany also supported the multi-donor initiative Sanitation for Millions by providing an initial budget of EUR 5 million. The initiative strengthens access to safe sanitation especially in countries with high numbers of refugees and IDPs by improving facilities in public schools, health care facilities and mosques. Under the Special Initiative ‘Tackling the root causes of forced displacement - reintegrating refugees’, Germany follows an integrative approach to supporting members of the host communities besides refugees and IDPs.

Cross-border, disaster and climate related displacement

In January 2018, Germany handed over the chairmanship of the Platform on Disaster Displacement (PDD), which was launched by Germany during the World Humanitarian Summit in 2016, to Bangladesh. Germany remained an active member of the PDD Steering Group throughout 2018. Germany actively contributed to the prominent integration of disaster displacement in relevant
policy processes, especially the Global Compact for Safe, Orderly and Regular Migration (GCM). In 2018, Germany also continued its financial support for the operational and organizational structures of the PDD as well as for specific projects related to disaster displacement. This was to improve knowledge, to fill data gaps and to enhance the use of effective practices on regional level to address the protection needs in the context of disaster and climate-induced displacement. Germany also implemented a program to foster sustainable management of human mobility within the context of climate change.

Other
Statelessness can be both the cause and consequence of humanitarian crises and represents one of the main challenges for the international community in displacement situations. Without a nationality, people often lack basic rights such as education, health care or the right to work. Moreover, they are not protected against arbitrary arrest. By funding UNHCR's preparation of the 2019 High-Level Meeting on Statelessness, which marks the mid-term point of UNHCR’s #IBelong Campaign to End Statelessness by 2024, Germany contributes to the achievement of the goals of the campaign.

☑ Grand Bargain
☑ Platform on Disaster Displacement

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
☑ Funding amounts
☑ Information management/tools
☑ Joined-up humanitarian-development analysis, planning, funding and/or response

B. How are these challenges impacting achievement of this transformation?
The operationalization of political commitments to address displacement is a challenge as it requires working across sectors, mandates and areas of expertise. Limited access to areas, where internal displacement is particularly prevalent, remains a challenge. In some countries, there is limited data on the numbers and dynamics of internal displacement.

3. What steps or actions are needed to make collective progress to achieve this transformation?
The implementation of the Global Compact on Refugees, the Global Compact for Safe, Orderly and Regular Migration (GCM) and the promotion of coherence and enhanced cooperation across relevant global policy processes like the Agenda for Humanity remain fundamentally important to successfully meet the needs of forcibly displaced persons and host communities. While IDPs are only marginally referred to in the GCR, Germany remains keenly interested in supporting them and their host communities, in line with the overarching principle to “leave no one behind”.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Through the German-Moroccan co-chairmanship of the Global Forum on Migration and Development (GFMD), Germany provided a unique opportunity to engage in multi-stakeholder discussions towards the formulation of the Global Compact on Safe, Orderly and Regular Migration (GCM). Under the joint chairmanship of Germany and Bangladesh, the GFMD ad hoc Working Group on the 2030 Agenda and the GCM provided - on behalf of all GFMD Member States - a substantive contribution to the work on the GCM, i.e. by submitting a thematic report to the 2018 High-Level Political Forum, highlighting migration-related SDGs. Germany actively engaged in all phases of the process leading up to the adoption of the GCM. During that period, Germany was also active in promoting the GCM in inter-governmental consultations as well as to national civil society and the general public. As former chair of the Platform on Disaster Displacement (PDD), Germany successfully advocated for the integration of the challenges of human mobility and displacement in the context of disaster and the adverse effects of climate change into the GCM. and for the integration of the need to enhance protection of disaster-displaced persons. Germany was among the 152 countries that adopted the compact on 10-11 December 2018 during the Intergovernmental Conference in Marrakesh. The supportive position of the German government towards the GCM was emphasized in a speech by Chancellor Angela Merkel.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit

☑ Platform on Disaster Displacement

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Data and analysis
☑ Multi-stakeholder coordination
☑ Strengthening national/local systems

B. How are these challenges impacting achievement of this transformation?

Insufficient and unreliable data can be a hindering factor when it comes to efficient formulation and implementation of migration policies. In the face of multiple, sometimes parallel processes in the context of global migration governance, policy incoherence may hinder the achievement of envisaged results.

3. What steps or actions are needed to make collective progress to achieve this transformation?

It is essential to use the existing inter-linkages between global processes (i.e. GCM, GCR, 2030 Agenda, Sendai Framework, Platform on Disaster Displacement, etc.) so that the results can complement each other in an efficient manner. In addition, good practices and lessons learned based on experiences made in the field should be scaled up, either regionally or thematically.

1. **A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.**

**Empowerment of women and girls**

As a partner of the Call-to-Action for Addressing Gender-Based Violence (GBV) in Emergencies, Germany uses its role in supervisory and advisory boards of humanitarian organizations to advocate for greater empowerment of women and girls in humanitarian assistance. In the Democratic Republic of the Congo, Germany funds a project to promote the establishment of community-based protection committees, with at least 50 per cent female members, as well as women's forums to develop and implement protection programs i.e. to raise awareness about the rights and responsibilities of community members, and to develop self-protection strategies.

In its development cooperation, Germany supports the project "Enhancing Women’s Leadership for Sustainable Peace in Fragile Contexts in the MENA Region" by UN Women, aiming to increase women’s meaningful participation and influence in peace processes, e.g. through knowledge generation, capacity development, and by providing technical expertise. Seamstresses in Myanmar, for example, are encouraged to connect with each other and learn about their rights, health and safety using digital applications.

**Gender equality programming**

Germany is now systematically demanding its partners to gather disaggregated data on gender, age and disability, and to provide information on their strategies to foster inclusion in the design and delivery of their humanitarian projects. Moreover, it continues to be a priority that Germany’s partners respect international standards and guidelines, such as the UN Gender Guidelines for Mine Action Programmes, which promote the employment of women in mine action programmes as deminers. In Ukraine, for example, Germany increased funding, which enabled the proportion of female deminers in the entire team to be increased from 8 to 18 percent compared to 2017.

In the context of its development cooperation Germany is committed to the gender-sensitive design of technical and vocational training in order to promote women’s participation in economic life in Pakistan. In cooperation with UNDP in Syria, women receive...
targeted training to start up cooperatives and to integrate them into sustainable value chains. During the Canadian G7 presidency, Germany announced 75 million EUR to support quality education for women and girls in crisis and conflict situations. The "Returning to New Opportunities" programme offers both returnees and local men and women opportunities by promoting employment, vocational training, and supporting business start-ups.

**Sexual and reproductive health**

Germany supports Family Planning and Maternal Health in the context of its development cooperation with EUR 100 million annually (12 GIZ and 16 KfW projects). In Rwanda, funding has helped to inform girls on their sexual and reproductive rights and in Yemen to implement a minimum service package to ensure access to sexual and reproductive services in fragile settings. In Ukraine, Germany scaled up humanitarian funding for a UNICEF project, which focuses on providing maternal and child health services, free essential medicines to pregnant and lactating women and related training for health professionals. Moreover, Germany increased annual core funds for UNFPA from EUR 22 million to EUR 33 million and for the International Planned Parenthood Federation (IPPF) from EUR 6 million to EUR 12 million.

The elimination and prevention of sexual and gender-based violence (SGBV) continues to be a priority. Germany funded the ICRC Special Appeal ‘Strengthening the Response to Sexual Violence’ with an additional EUR 2 million (for a total of EUR 8 million since 2014). In Cameroon, the Central African Republic, Niger and Nigeria, Germany also scaled up funding to enhance access to protection services to girls and women who have suffered from GBV by establishing a case management system and community dialogue platform.

**Other**

As a donor, Germany seeks to bring about institutional change and to ensure that all partners abide by international standards e.g. the Core Humanitarian Standard, the IASC Minimum Operating Standards for the Protection from Sexual Exploitation and Abuse (PSEA), and, in the context of demining, the UN Gender Guidelines for Mine Action Programs. The fight against female genital mutilation (FGM) continues to be an important focus for Germany’s development cooperation. Since 2016, in Burkina Faso, over 200 families have been sensitized to this harmful practice in around 1,400 dialogue sessions. In Guinea, a GIZ project fostered dialogue forums between religious authorities and health experts as well as training courses for health personnel. NGOs like FEMNET, Equality NOW and Deutsche Stiftung Weltbevölkerung (DSW) have been supported in implementing projects tackling FGM and child and early marriage.

A GIZ program developed a new concept for mental health and psychosocial support training in development cooperation together with Medica Mondiale and the Academy for International Cooperation. Additionally, training for employees of State and non-governmental development cooperation groups, as well as additional target groups, such as teachers in Turkish schools who support refugees, were developed and implemented.

**B. Please select if your report relates to any initiatives launched at World Humanitarian summit**

☑ A Global Undertaking on Health in Crisis Settings
☑ Charter for Change
☑ Charter on Inclusion of Persons with Disabilities in Humanitarian Action
☑ The Compact for Young People in Humanitarian Action
☑ The Inclusion Charter

**2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.**

☑ Data and analysis
☑ Field conditions, including insecurity and access
☑ Gender and/or vulnerable group inclusion

**B. How are these challenges impacting achievement of this transformation?**

Germany started requiring partner organizations to provide disaggregated data and qualitative information on how needs/capabilities of women, men, girls and boys are accounted for in humanitarian projects. Occasionally, this presents a challenge to commitments for simplified and harmonized reporting. There are difficulties in obtaining reliable and meaningful data, especially in conflict-affected areas.

**3. What steps or actions are needed to make collective progress to achieve this transformation?**

As a donor, Germany will continue to push its partners towards gender sensitive programming, an important condition for both effective humanitarian assistance and development cooperation. Germany is committed to systematically collect and evaluate...
information provided by all project partners aiming to develop and share lessons learnt in the context of humanitarian assistance. However, more concerted action and a multi-sectoral, multi-stakeholder approach is needed to develop common standards for data disaggregation, programming and reporting.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

The promotion of education for children, adolescents and young people as well as measures to ensure safe learning environments and the protection of children remain a high priority for Germany. Through its special initiative 'Tackling the root causes of forced displacement – reintegrating refugees', German development cooperation is funding more than 40 projects with over EUR 400 million to improve access to education for forcibly displaced people and host communities. In 2018, for the countries neighboring Syria alone, the initiative provided funding exceeding EUR 50 million to improve primary and secondary education for Syrian refugee children and children of host communities. Germany continued its support to UNICEF to implement projects focusing on access to and quality of basic services, with a strong focus on quality basic education, including WASH in schools. Germany committed EUR 50 million to the 'Reaching all Children with Education' program in Lebanon for the 2018-2019 school year and financially supported education projects for refugees and migrants in Greece. Furthermore, Germany committed additional EUR 10 million in multi-year funds to the 'No-Lost-Generation' initiative in Syria, which supports 150,000 vulnerable children and adolescents. Germany committed EUR 159 million in multi-year funds to UNICEF projects with education components in Bangladesh, Central African Republic, Eastern Sudan, Iraq, Jordan, Nigeria, Somalia and Zimbabwe. In 2017-2018, Germany contributed EUR 31 million to the Education Cannot Wait initiative launched at the WHS to transform the delivery of education in emergencies. During the Youth Forum 2018 (UN Major Group for Children and Youth, in partnership with UNICEF), Germany stressed its particular emphasis on addressing the needs of migrant and refugee children and youth. Furthermore, projects funded by German humanitarian assistance often comprise education components. Approximately EUR 46 million of such project funding were allocated to education.

☑ Education Cannot Wait

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☐ Data and analysis
☐ Funding amounts
☐ Gender and/or vulnerable group inclusion

B. How are these challenges impacting achievement of this transformation?

Germany supports the inclusion of forcibly displaced persons in existing education systems, which are often already overstretched. Additional resources are therefore required. In its humanitarian assistance portfolio, Germany does not ask its project partners to provide disaggregated data regarding spending on education. Accordingly, measuring the shift poses a challenge.
3. What steps or actions are needed to make collective progress to achieve this transformation?

Germany has funded various initiatives to provide additional infrastructure, finance teacher salaries and teach in double-shift systems in host countries surrounding Syria and in Iraq to meet the demand for education and avoid the establishment of parallel structures. Germany also works with vocational training institutes to include refugees and internally displaced persons and offer courses adapted to their specific skill set and needs.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany has developed a “gender-age-disability marker” to mainstream age sensitive programming and ensure that the different needs and capabilities of young women and men, girls and boys are accounted for in its humanitarian assistance. Germany has started to gather and share lessons learnt to incentivize our partners to give greater consideration to children and adolescents at all stages of the project cycle.

Germany remains committed to the Compact for Young People in Humanitarian Action and has funded several humanitarian projects that ensure the protection of children and young people, but also build on their strengths and capabilities. For instance, Germany funded a Diakonie project in Colombia to support adolescents in finding ways of living without engaging in criminal gang activity, and a UNICEF project to support the reintegration of children associated with armed groups in Nigeria. Additionally, Germany supported numerous projects that offer psychosocial support and foster resilience among children and adolescents affected by conflict in Myanmar, Philippines and Tanzania.

German development cooperation recognizes the potential of youth as peacebuilders and key players in conflict resolution and violence prevention. In East Timor, for instance, overall social cohesion is strengthened by empowering young people to take part in civic engagement and non-violent conflict resolution. A key activity has been the implementation of the action plan ‘Agents for Change – Children’s and Youth Rights in German Development Cooperation’, which aims to expand Germany’s engagement in the fulfillment of protection, provision and participation rights of children and young people. Currently, eight new innovative projects are being implemented in Guatemala, Lesotho, Lebanon, Madagascar, Palestine, Peru, Rwanda and Zambia, focusing on the most disadvantaged children and youth. The action plan puts a strong focus on vocational education and training, e.g. through the Kenyan-German vocational educational initiative that promotes youth employment.

☑ The Inclusion Charter

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
Data and analysis

B. How are these challenges impacting achievement of this transformation?

Reliable data is lacking on how the different needs and capabilities of young people are informing the development, delivery and evaluation of humanitarian and development programming in a systematic way. Access, coordination, capacity and know-how of project partners are major obstacles for a child- or youth-centred approach.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Germany will continue to sensitize its partners to consider the needs of children and adolescents as an an important priority and condition for effective and efficient humanitarian assistance and development cooperation. Germany is committed to systematically collect and evaluate information provided by humanitarian project partners with the goal of developing and sharing lessons learnt. Germany continues to fund trusted partners to provide research, develop guidance and deliver training, in addition to projects specifically targeted at young people.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany has developed a “gender-age-disability marker” to mainstream disability sensitive programming and ensure that the different needs and capabilities of women, girls, men and boys with disabilities are accounted for in its humanitarian assistance. Germany also continues to support the OECD-DAC “Disability Inclusion Marker” for development programming. Germany’s updated strategy on humanitarian assistance also reflects inclusion as an important cross-cutting theme. Additionally, Germany is planning to launch its first cross-sectoral ‘Strategy for the Inclusion of Persons with Disabilities’ in German development cooperation, which also considers the needs and rights of persons with disabilities in fragile contexts. Germany is a steering committee member of the Global Action on Disability Network (GLAD), which shares expertise and coordinates action with regard to disability-inclusive programming and advocacy in international development cooperation and humanitarian assistance. A working group on humanitarian action advises and comments on recommendations on disability-inclusive standards and guidelines. Germany continues to fund Handicap International Germany, Christoffel-Blindenmission and Ruhr-University Bochum with more than EUR 1.3 million (2018-2022) to help develop Inter-Agency Standing Committee guidelines, to deliver training to project partners, and to provide valuable research and data for inclusive programming, among others. Germany has also continued to fund HelpAge to develop an e-learning platform for organizations in Iraq, Lebanon, Syria, Turkey and Yemen.

Numerous humanitarian projects focused in full or in part on persons with disabilities. For example, in the Central African Republic, Germany funded a project on inclusive emergency aid and physical and functional rehabilitation. In Afghanistan, Germany started funding a multi-sector project, which includes training, provision of physiotherapy services, and distribution of assistive devices for people with disabilities. In addition, Germany launched a number of inclusive development projects as part of the special initiative ‘Tackling the root causes of forced displacement - reintegrating refugees’ e.g. in Nigeria, Kenya and Syria.

☑ Data and analysis
☑ Human resources/capacity
☑ Institutional/Internal constraints

B. How are these challenges impacting achievement of this transformation?

While Germany is asking partners to provide disaggregated and qualitative information on how needs and capabilities of persons with disabilities are accounted for in humanitarian and development projects, it remains a challenge to balance this with our commitment for simplified and harmonized reporting. There are difficulties in obtaining reliable data.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Germany will continue to sensitize its partners to consider inclusion a priority and condition for effective and efficient humanitarian assistance and development cooperation. Germany is committed to systematically collect and evaluate information provided by project partners, develop and share lessons learnt. At the same time, Germany funds trusted partners to provide research, develop much needed guidance, and deliver training. However, more concerted action is needed to develop common standards for data disaggregation and inclusive programming.

Germany endorses the Statement of the Social Protection Interagency Cooperation Board to the WHS “How linking social protection and humanitarian action can bridge the development-humanitarian divide”. Germany supports global learning on shock responsive social protection and explores possibilities to foster pilot projects in this regard. It endeavors to move short-term cash-programs into longer-term social protection systems.

In order to increase efficiency of humanitarian assistance in situations of displacement, Germany will increase and promote multi-year humanitarian financing, livelihood interventions as well as cash-based assistance.

Recognizing the importance of humanitarian assistance to be accountable to crises and disaster affected people, Germany commits to ensure that crises and disaster affected people, especially women and girls, participate in the design of humanitarian projects and programmes, and that adequate and well-coordinated feedback mechanisms are established to adapt assistance programs if required.

Recognizing the potentially transformative power of humanitarian cash transfers Germany commits to (1) ensuring that cash is equally considered alongside other response modalities throughout a humanitarian response and that where feasible, cash is used as the preferred and default modality; (2) significantly increasing the amount of funding available to support cash programming, including multi-purpose cash transfers; (3) building internal capacity to carry out cash programming; (4) systematically carrying out joint cash feasibility assessments as part of preparedness.

| Core Commitments |

|                   | Change People's Lives: From Delivering Aid to Ending Need |

Core Responsibility
Commit to a new way of working that meets people's immediate humanitarian needs, while at the same time reducing risk and vulnerability over multiple years through the achievement of collective outcomes. To achieve this, commit to the following: a) Anticipate, Do Not Wait: to invest in risk analysis and to incentivize early action in order to minimize the impact and frequency of known risks and hazards on people. b) Reinforce, Do Not Replace: to support and invest in local, national and regional leadership, capacity strengthening and response systems, avoiding duplicative international mechanisms wherever possible. c) Preserve and retain emergency capacity: to deliver predictable and flexible urgent and life-saving assistance and protection in accordance with humanitarian principles. d) Transcend Humanitarian-Development Divides: work together, toward collective outcomes that ensure humanitarian needs are met, while at the same time reducing risk and vulnerability over multiple years and based on the comparative advantage of a diverse range of actors. The primacy of humanitarian principles will continue to underpin humanitarian action.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

**Strengthening national/local leadership and systems**

Germany supported capacity-building activities at national and regional levels. Regarding disaster risk reduction, Germany strengthened preparedness capacities of national and local responders e.g. integration of forecast-based Action within the International Federation of the Red Cross’ Disaster Relief Emergency Fund (DREF). Germany cooperated with the Start NGO Network to support local NGOs’ capacities to better anticipate disasters and crises. Germany continued to help partners strengthen national health systems in the areas of preparedness and response to health crises.

Germany is currently the second-largest donor to Country-Based Pooled Funds (CBPF). More than 25% of CBPF allocations were granted to national NGOs. As co-chair of the Pooled Fund Working Group, Germany supported discussions how CBPFs can further support national NGOs.

During the revision of its Transitional Development Assistance Strategy, Germany sharpened the definition of resilience. Strengthening resilience includes (re-)building capacities of local institutions to cope with crises. In 2018, more than 90 transitional development assistance projects strengthened capacities of individuals, organizations and/or institutions at local and regional level.

Germany supported selected Governments in developing a coherent and balanced migration policy in line with international and...
Building community resilience
In 2018, German humanitarian assistance supported relief, disaster risk reduction and preparedness. Germany paid special attention to capacity building and supported resilience building for local partners of humanitarian organizations, including communities at risk. In 2018, regional risk reduction and preparedness workshops were supported by Germany to further enhance capacities of local implementing partners.

Building resilience is the guiding principle of Germany’s Transitional Development Assistance. One example is the German-World Food Programme Resilience Initiative for Chad, Niger, Mali, Mauritania and Burkina Faso. It started in 2018, targeting one million beneficiaries with funding of EUR 55 million and additional EUR 31 million for 2019-2022. Between 2016 and 2018, Germany supported the Global Facility for Disaster Risk Reduction’s (GFDRR) Inclusive Community Resilience initiative with EUR 5 million.

The Special Initiative “Tackling the root causes of forced displacement – reintegrating refugees” aims to strengthen self-reliance and resilience by supporting individuals and communities to activate their own potential. In 2018, the Special Initiative provided more than EUR 512 million to benefit forcibly displaced populations and host communities, and to tackle root causes of displacement.

Germany supported the Global Network of Civil Society Organisations for Disaster Reduction (GNDR) with EUR 500,000 strengthening regional coordination, networking and capacity building.

People-centered approaches (feedback mechanisms, community engagement, etc)
Germany encourages its humanitarian partners to include participatory approaches throughout the project cycle. Germany reviewed its project proposal forms for humanitarian assistance and included questions on how participation of those in need and timely processing of and response to feedback is ensured. Partner organizations adopted innovative mechanisms for community engagement: In Niger, Welthungerhilfe is supporting community members in their own development of targeting criteria and beneficiary selection, empowering the community.

As co-conveners of the Grand Bargain work stream on simplified and harmonized reporting requirements, Germany and the International Council of Voluntary Agencies supported the inclusion of a mandatory question on participation of and accountability to affected populations in the Grand Bargain common narrative reporting template, which is currently being piloted in Iraq, Myanmar and Somalia.

Germany continued to fund the Core Humanitarian Standard Alliance promoting accountability to affected populations through advocacy, technical assistance and capacity development initiatives.

Germany’s Transitional Development Assistance works with a people-centered development-oriented approach on local and regional levels. It provides a pathway for beneficiaries to transition from humanitarian assistance to building resilience as envisaged by the HDP nexus. Germany committed new financing for the 2019 Transitional Development Programmes with a total volume of 892 million EUR.

Cash-based programming
Germany encourages implementing partners to always ask “Why not cash?” A checklist to improve the quality of cash and voucher assistance was introduced and received positive feedback from partners. Germany also adjusted its templates for humanitarian project grants, requesting partners to explain their choice of modality. The Grand Bargain Reporting Workstream’s 8+3 template is being updated accordingly. This will improve system-wide tracking of cash. With the same objective, Germany initiated a joint cash baseline of a group of humanitarian donors. Scaling up cash to meet people’s multiple needs in a holistic way, is also highlighted in the revised Humanitarian Strategy. In addition, more than 90 projects of Germany’s Transitional Development Assistance in 2018 included cash and vouchers.

Germany invested in strengthening its own and partners’ cash capacity: a new inter-agency working group of cash focal points from the German Government, UN and German NGOs shares good practice and promotes innovative cash programming. The group plans to reach out to the German public and parliamentarians in 2019. Germany also supported the Cash Learning Partnership (CaLP) to start in MENA region. Not least, Germany strengthened the humanitarian-development-peace nexus through embedding shock response capacities in regular national safety nets e.g. in the Sahel and Malawi.

Adherence to quality and accountability standards (e.g. CHS, SPHERE)
Strengthening the humanitarian system through cross-cutting and multi-sectoral approaches to increase the effectiveness and adherence of projects to quality and accountability standards is important for Germany. Germany finances several international initiatives that aim to improve the quality of humanitarian assistance. Germany is currently revising its partner capacity assessment, putting a stronger focus on quality assurance and effectiveness of funded efforts, including full adherence to the
Core Humanitarian Standards (CHS) and the Sphere standards. Germany funded the 2017-2018 revision process of the Sphere Handbook, which was successfully launched worldwide in November 2018. Staff use Sphere throughout all steps of the project management cycle to assess the quality of projects to ensure that affected communities are put at the centre of interventions, while maintaining quality and accountability of the humanitarian response. Germany has been funding efforts of the CHS Alliance and associated CHS verification and assessment mechanisms to ensure an effective dissemination, adoption, application and monitoring of the CHS and strengthening of quality, accountability and people management of organizations in the humanitarian sector.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit
☑ Grand Bargain
☑ New Way of Working

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
☑ Adherence to standards and/or humanitarian principles
☑ Funding amounts
☑ Joined-up humanitarian-development analysis, planning, funding and/or response

B. How are these challenges impacting achievement of this transformation?
Lack of funding hampers efforts to strengthen and build local and national humanitarian capacity.
Lack of clarity regarding cash coordination hinders our effort to do more and better cash. In March 2018, Germany and other Good Humanitarian Donorship donors sent a letter to the Inter-Agency Standing Committee requesting “clear, actionable guidance on cash coordination leadership”.

3. What steps or actions are needed to make collective progress to achieve this transformation?
Increased partnerships between international, national and local humanitarian actors, including funding to support such partnerships are needed to strengthen national and local humanitarian capacity.
A coordinated, harmonized approach amongst donors is pivotal to support efficient, effective and accountable humanitarian cash assistance, and support more collaborative approaches between partners. Germany will actively contribute to put donors’ shared vision for the increased use of cash into practice.

Germany commits to support the creation of national preparedness strategies and/or partnerships to strengthen national and local emergency management systems for natural disasters, which include: (a) inclusive contingency plans for response and recovery that set out clear lines of responsibility, triggers for SOPs for early action, and forecast-based financing; and include, when regional and global support is required, in what form and how it will be coordinated; (b) identification of populations at risk of displacement, and evacuation corridors and sites; (c) long-term investment in national and local preparedness, response and recovery capacities capable of responding to natural hazards, including civil protection, social protection, basic services, agriculture and other systems.

Germany commits to take a more systematic and integrated approach to risk management through measures that better integrate planning in climate change adaptation, disaster risk reduction, response and recovery, and through closer collaboration between different sectors and partners, so that investments in each are complementary, and based on a common analysis of risk and costs.

Germany commits to the participation of civil society, including local women's groups, and the private sector in the design, implementation and monitoring of disaster risk management policies and programs.

Germany commits, through its Global Initiative for Disaster Risk Management, to increase its regional and global cooperation structures in and around settings of conflict and fragility, especially in the area of DRR/DRM.

Germany re-commits to the principles and concepts of the Oslo Guidelines, and endorses (the development of) common humanitarian civil-military standards for deploying, receiving, integrating and coordinating foreign military assets in natural disasters.

Germany will commit to achieve the Sendai Framework target to increase people's access to multi-hazard early warning systems, and disaster risk information and assessments by 2030, including through initiatives, such as the Climate Risk Early Warning Systems Initiative and through the Global Initiative for Disaster Risk Management.

Commit to a new way of working that meets people’s immediate humanitarian needs, while at the same time reducing risk and vulnerability over multiple years through the achievement of collective outcomes. To achieve this, commit to the following: a) Anticipate, Do Not Wait: to invest in risk analysis and to incentivize early action in order to minimize the impact and frequency of known risks and hazards on people. b) Reinforce, Do Not Replace: to support and invest in local, national and regional leadership, capacity strengthening and response systems, avoiding duplicative international mechanisms wherever possible. c) Preserve and retain emergency capacity: to deliver predictable and flexible urgent and life-saving assistance and protection in accordance with humanitarian principles. d) Transcend Humanitarian-Development Divides: work together, toward collective outcomes that ensure humanitarian needs are met, while at the same time reducing risk and vulnerability over multiple years and based on the comparative advantage of a diverse range of actors. The primacy of humanitarian principles will continue to underpin humanitarian action.

Commit to accelerate the reduction of disaster and climate-related risks through the coherent implementation of the Sendai Framework for Disaster Risk Reduction 2015-2030, the 2030 Agenda for Sustainable Development and the Paris Agreement on Climate Change, as well as other relevant strategies and programs of action, including the SIDS Accelerated Modalities of Action (SAMOA) Pathway.

Change People's Lives: From Delivering Aid to Ending Need

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

**Disaster risk reduction and disaster risk management (including resilience)**

Germany expanded its engagement and donor outreach regarding anticipatory risk reduction and forecast-based financing, supported by its humanitarian budget line with more than 15 million EUR from 2014 to 2018. Germany worked closely with the International Federation of the Red Cross in developing their Disaster Relief Emergency Fund (DREF) forecast-based action window (launched in 2018, support EUR 1.1 million). Cooperation with the Start Network was established, specifically supporting the Start Fund Anticipation Window. Germany intensified cooperation with UNOCHA to integrate early action within the UN Central Emergency Response Fund, funded with EUR 95 million in 2018. Germany started a comprehensive risk management approach combining disaster risk management and climate change adaptation tools, including risk finance and insurance, building the basis for future German Development Cooperation activities. A new phase of the Global Initiative of Disaster Risk Management started in 2018 (with EUR 5 million funding until 2020), focusing on coherence of post-2015 agendas. Germany also established a program with EUR 4 million until 2020 to foster sustainable management of human mobility in the climate change context, including disaster displacement considerations. Germany continued to support UN Office for Disaster Risk Reduction (UNDRR, formerly UNISDR) with EUR 5 million, the Global Network of Civil Society Organisations for Disaster Reduction with EUR 0.5 million and the Global Facility for Disaster Risk Reduction (GFDRR) with EUR 10 million EUR.

**Disaster risk data collection/analysis**

In its disaster risk reduction funding, Germany made it mandatory that disaster risk analysis, vulnerability and capacity assessments are an integral part of the project design. As part of its anticipatory humanitarian assistance, Germany strengthened the operationalization of early warning, early action (EWEA) approaches by financing specific pilot projects that incorporate risk analysis and forecasting information e.g. extreme weather forecasts. Various forecast-based financing pilot projects supported by Germany are completely based on the identification of risk information and forecast thresholds to enable humanitarian early action ahead of a disaster. As part of its cooperation with UNDRR (formerly UNISDR) to develop global disaster risk data, Germany supported the Global Assessment Report on Disaster Risk Reduction (GAR), the Global Risk Assessment Framework (GRAF), the DesInventar Sendai Loss Database Tool, the establishment of the Global Partnership on Disaster Statistics and the establishment of national disaster risk reduction strategies that include risk monitoring frameworks.
with around EUR 1.3 million. Germany has also started a cooperation with the Potsdam Institute on Climate Impact Research to better understand climate-related risks in a number of countries in Sub-Sahara Africa, based on projected impacts of climate change across affected sectors and spatial scales under different climate-change scenarios.

**Preparedness**

Preparedness remained a core component of Germany’s humanitarian risk reduction funding. In this regard, Germany supported its NGO partners, the Red Cross and Red Crescent Movement as well as relevant UN organisations to strengthen their preparedness for response capacities in high risk countries with around EUR 26.2 million in 2018. Germany continued its funding for a specific Preparedness Working Group, bringing together major German humanitarian organisations, which are working in the context of preparedness. Germany also supported UNDRR (formerly UNISDR) in their implementation and monitoring of the Sendai Framework with EUR 1 million in 2018 and the World Food Programme (WFP) in their preparedness activities, for example by funding WFP’s Emergency Preparedness and Response Division at WFP headquarters with EUR 3 million in 2018 as well as by funding preparedness projects in Asia. Furthermore, Germany supported new projects with its development cooperation risk reduction funding to strengthen local preparedness structures, for example, the establishment of flood risk management systems in the Western Balkan and Vietnam as well as building capacity for the emergency management system in Ukraine.

**Other**

Germany continued its support for the WFP Innovation Accelerator with EUR 5 million in 2018. The Innovation Accelerator supported the development of 28 innovative projects addressing hunger and malnutrition in 2018. In the past year, the WFP Innovation Accelerator has put increasing emphasis on scaling up innovative projects at field-level demonstrating the high potential to increase efficiency and effectiveness of projects on the ground. As part of its cooperation with UNDRR, Germany supported the UNDRR Private Sector Alliance for Disaster Resilient Societies (ARISE) with around EUR 280,000. Germany also started looking at challenges and opportunities for disaster risk reduction in fragile and conflict-affected contexts. Together with the Overseas Development Institute (ODI), German development cooperation supports research on evidence-based interrelations of disasters in fragile and conflict-affected contexts. A flagship report and review of tools will be ready in 2019 and presented at the Global Platform for Disaster Risk Reduction.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit

☑ Global Partnership for Preparedness
☑ Platform on Disaster Displacement
☑ Risk and Vulnerability Data Platform
☑ The Global Alliance for Humanitarian Innovation

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Data and analysis
☑ Funding amounts
☑ Multi-stakeholder coordination

B. How are these challenges impacting achievement of this transformation?

Limited international funding and escalating humanitarian needs make it more challenging to invest in anticipation, while there are enormous needs to deal with in acute emergencies. The great variety of data and analysis tools impedes quick, comprehensible and coherent action. Being a cross-cutting issue, disaster risk reduction requires extensive multi-stakeholder coordination.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Anticipation, risk reduction and preparedness measures need more intensive support within the humanitarian system to address rising needs, especially regarding extreme weather disasters and climate change. Innovative early warning, early action approaches need to be integrated into existing funding instruments. Cooperation and synergies between humanitarian assistance and development cooperation must be further enhanced. Joined-up planning and decision-making would largely benefit from a coordinated use of data.

Commit to a new way of working that meets people's immediate humanitarian needs, while at the same time reducing risk and vulnerability over multiple years through the achievement of collective outcomes. To achieve this, commit to the following: a) Anticipate, Do Not Wait: to invest in risk analysis and to incentivize early action in order to minimize the impact and frequency of known risks and hazards on people. b) Reinforce, Do Not Replace: to support and invest in local, national and regional leadership, capacity strengthening and response systems, avoiding duplicative international mechanisms wherever possible. c) Preserve and retain emergency capacity: to deliver predictable and flexible urgent and life-saving assistance and protection in accordance with humanitarian principles. d) Transcend Humanitarian-Development Divides: work together, toward collective outcomes that ensure humanitarian needs are met, while at the same time reducing risk and vulnerability over multiple years and based on the comparative advantage of a diverse range of actors. The primacy of humanitarian principles will continue to underpin humanitarian action.

Change People's Lives: From Delivering Aid to Ending Need

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Joined-up humanitarian-development analysis and planning towards collective outcomes

To improve humanitarian civil-military coordination and the application of Military and Civil Defence Assets (MCDA)/Oslo Guidelines, Germany funded a UNOCHA course for representatives of UN agencies, governments and NGOs working in the Middle East.

Germany continued to support the Global WASH Cluster by facilitating its 2018 annual meeting in Berlin, together with the German WASH network. Germany continued to strengthen World Health Organization's (WHO) coordinating role in health crisis by supporting its Health Emergency Work Force. In 2018, two additional German Emergency Medical Teams (EMT) type 1 were certified by the WHO (5 German emergency medical technicians in total). Germany assigned a national EMT focal point.

Germany continued to implement the national guidelines on “Preventing Crises, Resolving Conflicts, Building Peace” to strengthen structures and processes and foster coherence across the humanitarian-development-peace nexus. An inter-ministerial task force was established to draft a manual on best practices for context analysis, planning, strategy development and implementation of measures. First country pilots for joined-up humanitarian-development analysis and planning are underway in Iraq, Nigeria and Somalia.

As co-chair of the OECD International Network on Conflict and Fragility (INCAF), Germany actively supported the drafting of the Development Assistance Committee (DAC) Recommendation on Humanitarian-Development-Peace Nexus to guide and support joined-up analysis and planning.

Financing Collective outcomes

Germany continued to support WHO’s Emergency Reform to strengthen its leadership in preparedness and response to health crisis. In 2018, Germany contributed USD 16.92 million to the WHO Contingency Fund for Emergencies (CFE). Germany continues to be the biggest donor to the CFE (USD 31.63 million in total). Germany advocates a more sustained financing mechanism and larger donor base.

Germany supported innovative risk financing mechanisms to enable humanitarian stakeholders to better anticipate and react more effectively to rising risks in disaster-prone countries. With its Transitional Development Assistance (TDA), Germany’s development cooperation has a dedicated instrument to finance development- and sustainability-oriented action in crises settings and to bridge the gap between humanitarian assistance and development cooperation. This innovative budget line provides multi-year funding (new commitments in 2018 in the amount of EUR 740 million).

Germany’s humanitarian assistance and TDA plan joined-up support for nexus projects of NGOs in Lebanon, Iraq and Somalia. In large-scale protracted refugee situations, the Comprehensive Refugee Response Framework (CRRF) established by the New York Declaration (19/09/2016) represents the operationalization of the humanitarian-development-peace Nexus. Germany supports the CRRF rollout comprehensively from humanitarian and development budget lines.

Germany supports the multi-donor-platform Sanitation for Millions, improving access to safe sanitation especially in host communities (EUR 5 million EUR).

Investing in disaster risk reduction

Disaster risk reduction (DRR) is an important pillar of the German humanitarian assistance and development cooperation. In
total, Germany provided EUR 27 million for disaster preparedness and risk reduction activities as part of humanitarian assistance in 2018. The UN Office for Disaster Risk Reduction (UNDRR) received EUR 1 million for the Sendai Framework Monitoring Tool. Numerous humanitarian projects funded include disaster risk reduction components.

As part of its Transitional Development Assistance, Germany invested more than EUR 15 million for disaster risk reduction in 2018. UNDRR received EUR 5 million and the Global Network of Civil Society Organisations for Disaster Risk Reduction (GNDR) EUR 500,000. Furthermore, the Global Facility for Disaster Reduction and Recovery (GFDRR) received EUR 15 million between 2016 and 2018.

**Other**

Germany contributed EUR 5 million to the World Food Programme Innovation Accelerator, which supported the development of 28 innovative projects in 2018, addressing hunger and malnutrition in 35 countries. The WFP Innovation Accelerator has put emphasis on scaling up innovative projects at field-level demonstrating potential to increase efficiency and effectiveness of projects on the ground. Successful innovations include the use of blockchain technology for financial transactions with Syrian refugees in Jordan; WFP’s hydroponics project; and Tech for Food (T4F), which puts job opportunities in the global digital economy within reach of adolescent refugees from Syria.

Germany contributed to strengthening emergency response capacities of national and local humanitarian organizations in the WASH sector through the Sustainable Sanitation Alliance (SuSanA), which brings together humanitarian assistance and development actors. With the “Compendium of Sanitation Technologies in Emergencies”, Germany enabled a successful cooperation at the interface between development cooperation, and humanitarian assistance. Furthermore, Germany provided more than EUR 508 million through its Special Initiative ‘Tackling the root causes of forced displacement – reintegrating refugees’ to improve the living conditions for displaced people and host communities. Through this Special Initiative, Germany funded more than 40 projects with mental health and psychosocial support components since 2014.

**B. Please select if your report relates to any initiatives launched at World Humanitarian summit**

☑ Grand Bargain
☑ New Way of Working

2. **A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.**

☑ Institutional/Internal constraints
☑ Joined-up humanitarian-development analysis, planning, funding and/or response
☑ Multi-stakeholder coordination

**B. How are these challenges impacting achievement of this transformation?**

Amongst other aspects, barriers to information and data sharing, in part due to institutional constraints and data protection concerns, impede closer and forward-looking multi-stakeholder coordination.

3. **What steps or actions are needed to make collective progress to achieve this transformation?**

More dedicated funding for innovative projects needs to be made available. Based on the overarching commitment to “leave no one behind”, the roles and responsibilities of humanitarian and development actors in the field and at headquarters must be clearly delineated and appropriate mechanisms must be established to facilitate joint analysis, and joined-up planning and programming with a view to deliver a more comprehensive response to people’s needs.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.
Direct funding to national/local actors
The practice to direct smaller-scale humanitarian funding to national/local actors via its embassies worldwide is an integral part of Germany’s humanitarian assistance. In development contexts, German funding for refugee and IDP projects is generally channelled through government agencies, multilateral and international nongovernmental institutions, who then partner with national/local actors.
Germany demonstrates its commitment to local capacities through increased funding of country-based pooled funds, which are a financing instrument that local partners have particularly good access to. Furthermore, Germany is strengthening the capacities of the Red Cross and Red Crescent Movement by its willingness to contribute 10 to 15% of its International Committee of the Red Cross (ICRC) funding for the cooperation with National Societies. In addition, Germany supported the IFRC’s Disaster Relief Emergency Fund (DREF) with EUR 0.75 million as well as the forecast-based action component of the DREF with EUR 1.1 million in 2018. These contribute to strengthening the capacities of National Societies in the area of disaster risk management. In 2018, Germany put in place a mechanism that allows international humanitarian NGOs to pass on a share of their funding received for indirect costs (maximum 7% of the overall project costs) directly onto their local implementing partners.

Addressing blockages/challenges to direct investments at the national/local level
In 2018, Germany continued to support humanitarian partners in their capacity and resilience building activities for local/national partners. This also included continued discussions through national and international platforms and fora with all partners, including Government, NGOs and International Organisations, to identify and prioritize challenges and solutions for the localization agenda.

Country-based pooled funds
Germany is currently the second largest donor to country-based pooled funds (CBPFs). Germany appreciates this financing instrument, since it puts localization at the forefront, as it provides local actors with particularly good access to funding. Access to funding through CBPFs is always available to the humanitarian organization that is best placed to respond to priority humanitarian needs in a particular context; these actors are increasingly local and national actors. This makes CBPFs one of the few financing instruments that give local and national organizations direct access to humanitarian funding. More than 25% of CBPF allocations were granted to national NGO partners in 2018. Moreover, the CBPF instrument provides local and national actors with the same percentage of indirect support costs, thereby helping to build and strengthen capacities of the organizations involved. CBPFs provide support for their implementing partners throughout the project cycle: from the application process to the final audit, thus strengthening the project implementation capacity of local and national actors in the field, which is important to Germany as a donor.

Capacity building of national/local actors
To further enhance capacities of national/local actors, Germany supports humanitarian and development capacity-building activities at both national and regional level through stand-alone projects and trainings, as well as through capacity development components directly integrated into ongoing projects in-country. These capacity-building efforts do not only focus on quality assurance and/or administrative aspects, but also include technical trainings on specific areas of expertise, including in its support to refugees, IDPs and host communities.
In 2018 for example, Germany scaled up a project in Gambella, Ethiopia with EUR 10 million to support a public utility-based service delivery model for an efficient delivery of WASH services for refugee camps and host communities. Capacity-building activities to the Ethiopian utility provider were a key part of the German support in order to ensure a sustainable and long-term service delivery.

Other
German NGOs and the German Government identified common priorities and key points to which they aspire in order to strengthen local partners. The paper has been published both in German and English. The development initiative ‘Partnership for Prospects’, with commitments of about EUR 308 million in 2018 for its cash-for-work scheme for the crises in Syrian and Iraq, puts particular emphasis on enhancing capacities of local government bodies to enable a better provision of services to communities and displaced populations. Through the ‘Partnership for Prospects’, refugees and citizens of host communities worked hand in hand to support communities for example in cleaning and repairing schools and mosques or collecting and recycling waste.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit
☑ Grand Bargain

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
B. How are these challenges impacting achievement of this transformation?

Lack of a clear division of labour between the different national and international development stakeholders, in particular between national actors in charge of refugees and local governments, negatively impacts efficient and effective capacity development of national/local partners in the long run.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Supporting capacity development of national/local partners remains a crucial part of German humanitarian assistance and development cooperation, especially as local actors generally have to shoulder the biggest burden in hosting and integrating displaced people. A joint approach of a diverse range of actors to support host communities, IDPs and refugees as well as national/local partner organizations is key to ensure solutions that help achieve collective outcomes that reduce needs, risks and vulnerability.

Germany, together with its G7 partners, is committing to further expanding climate risk coverage for poor and vulnerable people. Germany has initiated "InsuResilience", the G7 Initiative on Climate Risk Insurance. The aim of the initiative is to increase the number of poor and vulnerable people in low- and medium-income countries who have access to direct or indirect insurance coverage against climate-related hazards, by 400 million by 2020. Initial measures of this commitment will allow up to 180 million additional people to benefit from climate risk insurance coverage until the end of 2016. Germany committed an initial contribution of EUR 150 million which allows for the expansion of already established indirect risk insurance facilities such as the African Risk Capacity (ARC), the Pacific Catastrophe Risk Assessment and Financing Initiative (PCRAFI) and the Caribbean Catastrophe Risk Insurance Facility (CCRIF).

Commit to accelerate the reduction of disaster and climate-related risks through the coherent implementation of the Sendai Framework for Disaster Risk Reduction 2015-2030, the 2030 Agenda for Sustainable Development and the Paris Agreement on Climate Change, as well as other relevant strategies and programs of action, including the SIDS Accelerated Modalities of Action (SAMOA) Pathway.

Change People's Lives: From Delivering Aid to Ending Need Invest in Humanity

Commit to invest in risk management, preparedness and crisis prevention capacity to build the resilience of vulnerable and affected people.

Invest in Humanity

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany continued its risk reduction funding within its humanitarian assistance with EUR 27.2 million in 2018 and focused on improvement of early action approaches and humanitarian capacity building. Cooperation with UN organisations, the Red Cross/Red Crescent and NGOs was expanded. Special attention was given to further development of innovative risk financing approaches, such as forecast-based financing and integration of early action in existing financing instruments of the humanitarian system, such as the Central Emergency Response Fund and the IFRC Disaster Relief Emergency Fund (DREF). Germany specifically focused on developing the forecast-based action by the IFRC’s DREF, launched in May 2018. Besides already ongoing forecast-based financing projects, Germany supported another Red Cross pilot project in Vietnam. Germany established a new cooperation with the Start Network, supporting the Start Fund Anticipation Window and capacity building for Start Network members in the context of anticipation.

Germany spent more than 15 million EUR on disaster risk management within its Transitional Development Assistance and started linking DRR and Climate Change Adaptation funding strategies to strengthen risk informed development programming and advocacy. Germany continued its support to the InsuResilience Global Partnership to promote innovation around climate and disaster risk finance and insurance solutions. Special support was given to two member programs with new commitments of EUR 130 million: the World Bank’s Global Risk Financing Facility and KfW Development Bank’s InsuResilience Solutions Fund. Between 2016 and 2018, Germany supported the Global Facility for Disaster Risk Reduction with EUR 15 million and contributed EUR 10 million to the World Food Programme and Start Network for the African Risk Capacity (ARC) to replicate the insurance policies purchased by ARC Member States.

A new phase of the Global Initiative of Disaster Risk Management started 2018 with EUR 5 million funding from German development cooperation until 2020, to foster practical coherence of post-2015 agendas.

☑ Grand Bargain
☑ Platform on Disaster Displacement

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Funding amounts
☑ Joined-up humanitarian-development analysis, planning, funding and/or response
☑ Multi-stakeholder coordination

B. How are these challenges impacting achievement of this transformation?

Limited funding makes it challenging to invest more resources according to risk, which is needed to integrate innovative risk financing approaches. More coordinated analysis, planning and funding of humanitarian assistance and development cooperation is still a challenge and needs to be strengthened, as different stakeholders work in both fields.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Common understanding among donors and humanitarian organisations is needed to agree on investments to develop humanitarian financing instruments that address disaster risk more effectively. Preparedness, risk reduction and early warning, early action measures need to be improved and integrated to address imminent humanitarian needs and coordinated with development risk reduction and financing efforts. Humanitarian funding needs to be increasingly allocated also based on risk information to support the ongoing paradigm shift towards a more anticipatory humanitarian system.

</table>
Recognising that, within a country context, humanitarian, development, peacebuilding, stabilization and climate finance should be more coherent, Germany commits to 1) increasing contributions to the UN Peacebuilding Fund (PBF), which provides rapid financing to support sustaining peace over the long-term especially in protracted crisis countries, 2) ensuring that organisational structures and internal processes foster coherence between humanitarian, development peacubilding, stabilisation and climate finance, 3) strengthening the mechanisms for coordination at country level and globally to maximize policy coherence, 4) (donors) using positions on the boards of international organisations, agencies and financial institutions to ensure a comprehensive approach to the management of man-made and natural hazards.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

In line with the German Guidelines on ‘Preventing Crisis, Resolving Conflicts, Building Peace’, Germany continued to invest in stability and substantially expanded its funding for instruments relating to fragile contexts. In support of the UN Secretary-General’s prevention agenda and the sustaining peace resolution, Germany’s contribution to the UN Peacebuilding Fund was increased to EUR 32 million in 2018. Germany was Co-chair of the Peacebuilding Commission in 2018 and is an active member of several Groups of Friends, amongst others for “sustaining peace”. As part of its support to the Sustaining Peace agenda of the SG, Germany has consistently advocated for the PBF as well as other tools for conflict prevention and peacebuilding. In 2018, Germany committed EUR 3 million to UN DPPA’s Mediation Support Unit, to support the mediation stand-by team and programmatic activities. Also, Germany supported the UNDP-DPPA Joint Programme with EUR 5 Million, which enables the deployment of Peace and Development Advisers in countries around the world.

Germany has intensified its collaboration with the World Bank on the ‘Safeguarding Development in Crises and Conflict’ agenda. Disbursements of the International Development Association 18th Replenishment’s (IDA18) allocations are ongoing. Germany committed EUR 1.6 billion in contributions to the World Bank’s IDA18 replenishment. In this regard, Germany supported several special financing windows, such as the IDA Crisis Response Window (EUR 162 million), the IDA Window for Refugees and Host Communities (EUR 108 million) as well as the IDA Fragility Conflict and Violence Risk Mitigation Regime (EUR 32.4 million).

Germany has increased its financial contribution to the State and Peacebuilding Fund with a view to strengthening and supporting the Bank’s pivot to prevention and enhanced risk-focused programming through investments in knowledge and analytical products as well as greater coherence across the humanitarian-development-peace (HDP) nexus through its funding of the UN-World Bank HDP-Initiative.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit

☑ Grand Bargain
☑ New Way of Working
☑ The Peace Promise

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Data and analysis
☑ Field conditions, including insecurity and access
☑ Joined-up humanitarian-development analysis, planning, funding and/or response

B. How are these challenges impacting achievement of this transformation?

Enhanced investment in joint knowledge and analytical products is needed. Fragility, Conflict and violence drivers and root causes of conflicts need to be addressed. Institutional and societal resilience needs to be build. One should strengthen joined-up coordination, programming and financing across the humanitarian-development-peace nexus.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Prioritization of crisis prevention over crisis reaction needs to be made clear in programming priorities and funding for crisis prevention programming increased. Flexible financing instruments are needed for investment in fragile contexts. Partnerships for
more systematic coordination, planning and streamlining of conflict prevention need to be strengthened. Grievances and other risk factors need to be better addressed through joined-up programming on the basis of joined analysis of risks, needs, vulnerabilities and root causes of conflict.
**Finance outcomes, not fragmentation: shift from funding to financing**

</tbody>
</table>
Commit to promote and increase predictable, multi-year, unearmarked, collaborative and flexible humanitarian funding toward greater efficiency, effectiveness, transparency and accountability of humanitarian action for affected people.

Invest in Humanity

Commit to broaden and adapt the global instruments and approaches to meet urgent needs, reduce risk and vulnerability and increase resilience, without adverse impact on humanitarian principles and overall action (as also proposed in Round Table on "Changing Lives").

Invest in Humanity

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

Germany has further increased its financial support to multi-year and flexible funding in order to improve the timely and effective delivery of humanitarian assistance to people who need it most.

Germany increased the amount of non-earmarked humanitarian funding (core contributions to UNHCR, UNRWA, UNOCHA, ICRC and CERF) from EUR 105.5 million in 2017 to EUR 130 million in 2018. Softly earmarked humanitarian funding e.g. contributions to country-based pooled funds (CBPFs), increased from EUR 195.6 million in 2017 to a total of EUR 218.7 million in 2018. Germany also increased its multi-year humanitarian funding from EUR 607.6 million in 2017 to EUR 804 million in 2018. In order to provide affected people with a life in dignity, Germany also supported the strengthening of local responders and the scale-up of cash-based programming. Furthermore, forgotten humanitarian crises continued to be a focus area with a total funding of EUR 308.6 million in 2018, which accounts for 20% of Germany's overall humanitarian funding.

In 2018, German development cooperation increased its funding for the mitigation of structural root causes of forced displacement and the support to forcibly displaced persons and their host communities to approximately EUR 4.4 billion, substantially exceeding the 2017 level of approximately EUR 3.5 billion. As part of that effort, in 2018, the German Special Initiative 'Tackling the root causes of forced displacement – reintegrating refugees' provided more than EUR 512 million. In this framework, more than EUR 21 million were committed for projects of the German Civil Peace Service (ZFD) for non-violent conflict transformation in crisis and conflict regions. It aimed to tackle one of the major root causes of forced displacement and to contribute to the (re)integration of forcibly displaced populations and social cohesion. Refugees and host communities benefited from psychological support, peace education and dialogue measures.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit

☑ Grand Bargain

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.

☑ Field conditions, including insecurity and access
☑ Funding modalities (earmarking, priorities, yearly agreements, risk aversion measures)
☑ Multi-stakeholder coordination

B. How are these challenges impacting achievement of this transformation?

Budget rules and regulations limit possibilities to provide non-earmarked humanitarian funding. However, Germany was able to double its core contributions to UNHCR, OCHA and UNRWA for 2019.

Weak partner institutions’ capacities sometimes affect effective coordination. Security conditions sometimes lead to relocation of staff and to remote control and implementation delays.

3. What steps or actions are needed to make collective progress to achieve this transformation?

Further progress must be made in the implementation of Grand Bargain commitments concerning enhanced quality funding, additional funding from traditional and new Government donors, as well as funding from private sources.

There needs to be a continued focus on donor coordination in and between humanitarian assistance and development cooperation, combined with capacity development for local partners.

1. A. Highlight concrete actions taken between 1 January – 31 December 2018 to implement the commitments which contribute to achieving this transformation. Be as specific as possible and include any relevant data/figures as well as any good practices and examples of innovation.

In line with its WHS and Grand Bargain commitments, Germany continued to significantly contribute to pooled funds. By further...
increasing its Central Emergency Response Fund (CERF) contribution to EUR 95 million and contributing EUR 153.8 million to country-based pooled funds (CBPFs), Germany was the second largest donor to each of these two funding mechanisms in 2018. In its role as co-chair to the Pooled Fund Working Group (PFWG) until December 2019, Germany actively and substantially helped to shape the strategic direction of the CBPF mechanism, greatly enhancing its overall operational effectiveness, accountability, and potentially building synergies with other funding mechanisms (esp. CERF). A representative from Germany continues to serve as a member of the CERF Advisory Group. Germany also played a central role at the ECOSOC Humanitarian Affairs Segment in New York in June 2018 by, for the first time, bringing together a group of donors and co-leading (together with the UK Department for International Development) discussions on how to integrate ‘early action’ in CERF allocations, together with OCHA, IFRC and the START Network, aiming at strengthening relevance and efficient use of CERF funding and, ultimately, saving more lives. Germany also continued to provide and fund valuable staff support to both OCHA’s Funding Coordination Section/FCS (now: CBPF Section) and the CERF Secretariat, New York, through the UN Junior Professional Officer Program. Germany funds and has been substantially supporting OCHA CERF’s project on the diversification of its donor base, aiming at mobilizing high volume philanthropic funding from (ultra) high net-worth individuals and philanthropists.

B. Please select if your report relates to any initiatives launched at World Humanitarian summit
☑ Grand Bargain

2. A. Please select no more than 3 key challenges faced in implementing the commitments related to this transformation. Only the categories selected by the organisation will be seen below.
☑ Buy-in
☑ Human resources/capacity
☑ Institutional/Internal constraints

B. How are these challenges impacting achievement of this transformation?
Mobilizing additional sources for humanitarian funding requires commitment and investment, including human resources, which often is not available due to other priorities and needs perceived to be more urgent.

3. What steps or actions are needed to make collective progress to achieve this transformation?
Grand Bargain members need to uphold the momentum of the process by continuously working towards concrete and tangible progress regarding the implementation of the commitments. Additional funding from traditional and new Government donors as well as funding from private sources must be mobilized to close the gap between increasing humanitarian needs and limited funding from traditional humanitarian funding sources.
